

Why **EYO**?

In 2012, as the EYO Steel Door family with our experienced and professional team, we introduced steel doors to Cyprus. By maintaining a disciplined structure and keeping up with advancing technology, we evolved alongside the modernizing world.

From production to sales, from transportation to installation, we managed every stage together. At each step, we left the mark of our craftsmanship, dedication, and hard work.

Our products, which are 100% locally made, have showcased both our quality and the strength of our country to the entire world.

The story of quality and reliability continues at EYO Steel Door with new models... Seeing our customer satisfaction in every door we deliver has become our greatest motivation and mission to move forward.
